First Grant News

Dear Donors and Friends of LFOF,

It is so appropriate that at this Thanksgiving time, we are especially thankful to be able to share the exciting news that the Live For Others Foundation launched in December 2015 by our son, Tim, has already accomplished one of its major goals! Remember Tim's goal was for the Foundation to find a cure for Synovial Cell Sarcoma and in the ten months since family and friends said good-bye to Tim, we made a pledge to pursue his goals of the foundation while keeping him in our hearts forever.

Tim's surgeon who did his first major surgery in 2010 has made a commitment to start a specific research for Synovial Cell Sarcoma and it is with pride and joy that we announce **our first grant of \$50,000 to Dr. Bang H. Hoang MD at the Albert Einstein College of Medicine.** This grant was made possible because of the generosity of so many of you!

We owe a special thanks to Dr. E. Rubin and our granting board to make this happen so soon!

People continue to ask how we can help to keep Tim's wish alive? Please consider sending a donation of \$30 or more to www.liveforothersfoundation.com or simply "like" us on Facebook and share Tim's video "living Life's Journey".

We wish you a grateful and healthy holiday,

The Live For Others Foundation Team
